SECTION VII - SPILL AND LEAKAGE PROCEDURES (Control Procedures)

ACTION FOR MATERIAL RELEASE OR SPILL
Remove all sources of ignition. Contain spill. If significant amounts of dust are present, wear chemical safety goggles, Viton or Norfoil gloves, clothing designed to prevent or minimize skin contact and a NIOSH/MSHA approved dust respirator. Use non-static forming broom and dust pan to clean up dust. Undamaged signals may be picked up and put back into their original shipping containers or containers approved by local, state and federal authorities.

WASTE DISPOSAL METHOD
Disposal method of contaminated product and materials used in cleaning up spills will depend on the type and size of the spill. First remove the spilled materials and store in a manner to keep them away from ignition sources. Then contact local, state or federal safety specialists for information on disposal of the spilled material.
